Doors and Panels

Ironwood Door Lite partitions are built with translucent panels inserted in the doors. Inserts can be up to 1/2" thick and weigh up to 40lb. Doors with inserts are 1-1/4" thick (typical). Panels made with a variety of materials.

Pilasters

Shoes are 22 gauge ASTM A-167 stainless steel with satin finish, not less than 3" in height.

Door Hardware

Hinges are surface mount and strikes/keepers are wraparound style. Slide latches, coat hooks, and bumpers are surface mounted. Door pulls are through bolted. All fasteners are tamper proof.

Brackets

Stirrup-type one ear, two-ear, and u-brackets are provided with theft resistant fasteners.

Considerations

- Door Lite systems are not warranted for wet areas.
- Cost considerations should include insert material yield.
- Post installation vandalism and system reparability should be considered.

Ironwood Manufacturing reserves the right to make changes in design, material, and documentation without formal notice and without incurring obligation. Consult local and national codes: conformity and compliance to local and national codes is the responsibility of the installer. Verify all rough-in dimensions prior to installation.
