

# Tech Data: Oversize

| Options                                                                                                 |                                                                          |
|---------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|
| Oversize                                                                                                |                                                                          |
| <ul style="list-style-type: none"><li>Over 58" high door or panel</li><li>Over 58" wide panel</li></ul> | <ul style="list-style-type: none"><li>Dimensions can be custom</li></ul> |

## Oversize

Door and panel heights over 58" are considered oversize. Panel widths greater than 58" are also considered oversize. Components may be specified to any dimension.

## Pilasters

Shoes are 22 gauge ASTM A-167 stainless steel with satin finish, not less than 3" in height.

## Door Hardware

Hinges are surface mount and strikes/keepers are wraparound style. Slide latches, coat hooks, and bumpers are surface mounted. Door pulls are through bolted. All fasteners are tamper proof.

## Brackets

Stirrup-type one ear, two-ear, and u-brackets are provided with theft resistant fasteners.

## Considerations

- Door height/weight and hardware selection dictate maximum component height.
- Local building and ADA code should be reviewed for compliance.
- Directional patterns may limit stall depth
